# twobrains

**Who we are**

twobrains GmbH develops high-performance, tailor-made software solutions for multiple international companies in the industrial field. We use modern technologies from the visualization and real-time industry interdisciplinary – for the long-term benefit of our customers.

## We are looking for an experienced
# Software Developer C#
### with a strong passion for design and implementation of compact, robust and technically elegant solutions.

**Your responsibilities**

While developing Windows applications, you are involved into the entire life cycle of our projects: From understanding the customer's initial challenge to proposing different approaches, gathering the related requirements, developing prototypes to the final implementation. Your talent helps us to realize sophisticated, stable, and high-performance products.
**A goal oriented, pro-active, and self-motivated way of working is essential for our team.**

**What you need for this position**

- 3 or more years of experience as developer in at least one professional environment
- Strong programming skills in C#/.NET
- Experience with WPF/XAML
- A strong passion for clean coding and creative thinking
- Solid practice in the German or English language, making yourself understood verbally and written

**Beneficial knowledge**

- Experience with C/C++ programming
- Understanding the concepts of Multithreaded software architecture

**What you can expect from us**

- A young, well-rehearsed team with a lot of know-how and a passion for our work
- We prefer a lean hierarchy and transparent communication
- Versatile, varied projects and a word in them
- Insights into different types of industries
- A workplace with the latest hard- and software
- Support to grow through trainings and the courage to fail and improve
- FUN
- We pay a competitive salary

If you want to learn, create and grow with us, join us today.
